

**Amendments to the Claims:**

A detailed listing of all the claims that are, or were, in the application is presented below. Current amendments to the claims, including additions being shown by underlining and deletions being shown by strikethrough or double brackets, are expressed in the listing.

**Listing of Claims:**

1. (Currently Amended) A floor covering comprising a composition including polyvinyl chloride (PVC), a plasticizer in an amount of at least about 12 wt.% based on PVC and a substance capable of migration within the PVC composition, wherein the substance capable of migration is present in an amount of the substance capable of migration being in excess of its compatibility in from about 1.5 wt.% to about 15 wt.% based on the PVC total composition, wherein the floor covering has a profile with elevations and recesses, the average spacing between profile peaks in the centerline is more than about 200  $\mu\text{m}$  and less than about 1000  $\mu\text{m}$ , and the difference in height between the elevations and the recesses is from about 20  $\mu\text{m}$  to about 200  $\mu\text{m}$ .

Claim 2 (Canceled).

3. (Original) The floor covering according to Claim 1 wherein the floor covering is homogenous.

4. (Original) The floor covering according to Claim 1 wherein the floor covering is multilayered.

5. (Currently Amended) [[A]] The floor covering according to Claim 1 comprising a composition including polyvinyl chloride (PVC) and a substance capable of migration within the PVC, wherein the amount of the substance capable of migration is in excess of its compatibility in the PVC and the PVC has a K-value from about 40 to about 80.

Claim 6 (Canceled).

7. (Original) The floor covering according to Claim 1, wherein the substance capable of migration is a wax-like substance.

8. (Original) The floor covering according to Claim 7, wherein the wax-like substance is selected from the group consisting of a partially synthetic wax, a fully synthetic wax, a natural wax, a modified natural wax and mixtures thereof.

9. (Currently Amended) ~~[[The]]~~ A floor covering according to Claim 7 comprising a composition including polyvinyl chloride (PVC), a plasticizer in an amount of at least about 12 wt.% based on the total composition and a substance capable of migration within the composition, wherein the substance capable of migration is a wax-like substance comprises comprising a plurality of wax-like substances, the wax-like substances having different melting points, and wherein the amount of the substance capable of migration is in excess of its compatibility in the composition.

10. (Original) The floor covering according to Claim 7, wherein the wax-like substance comprises an amide wax.

Claim 11 (Canceled).

12. (Previously Presented) The floor covering according to Claim 1, wherein the floor covering further comprises a substrate and a coating, the coating comprising the PVC, plasticizer and substance capable of migration.

13. (Original) The floor covering according to Claim 12, wherein the coating has a thickness of about 10  $\mu\text{m}$  to about 100  $\mu\text{m}$ .

14. (Previously Presented) The floor covering according to Claim 12, wherein the substrate comprises the same PVC as the PVC of the coating.

15. (Currently Amended) The floor covering according to Claim 12, wherein the substrate is substantially free of the substance capable of migration and the coating comprises the substance capable of migration in an amount from about 1.5 wt.% to about 6 wt.% based on the ~~PVC~~ total composition of the coating.

16. (Previously Presented) The floor covering according to Claim 12, wherein the coating comprises a particulate material having a hardness greater than the hardness of the PVC of the coating.

Claims 17 and 18 (Canceled).

19. (Previously Presented) The floor covering according to Claim 1, wherein the composition comprises a particulate material having a hardness greater than the hardness of the PVC.

20. (Original) The floor covering according to Claim 19, wherein the particulate material comprises a polymer.

21. (Original) The floor covering according to Claim 19, wherein the particles of the particulate material have a largest diameter from about 2  $\mu\text{m}$  to about 100  $\mu\text{m}$ .

22. (Currently Amended) The floor covering according to Claim 19, wherein the particulate material is present in an amount from about 1 wt.% to about 20 wt.% based on the total amount of ~~PVC material~~ composition.

23. (Previously Presented) The floor covering according to Claim 19, wherein a plurality of the particles of the particulate material protrude above the surface of the PVC.

24. (Currently Amended) A floor covering comprising a composition including polyvinyl chloride (PVC), a plasticizer in an amount of at least about 12 wt.% based on PVC and a substance capable of migration within the PVC composition; ~~the amount of the substance capable of migration being in excess of its compatibility in the PVC~~; wherein the PVC has a K-value from about 40 to about 80; wherein the substance capable of migration is ~~[[a]]~~ at least two wax-like substances, each wax-like substance being selected from the group consisting of a partially synthetic wax, a fully synthetic wax, a natural wax~~[[,]]~~ and a modified natural wax ~~and mixtures thereof~~; and wherein the substance capable of migration is present in an amount from about 1.5 wt.% to about 15 wt.% based on the total amount of the PVC composition.

25. (Previously Presented) The floor covering according to Claim 24, wherein the composition comprises a particulate material having a hardness greater than the hardness of the PVC.
